PROFESSIONAL SUMMARY

Computer Science graduate who builds web apps and AI-powered tools with JavaScript, Python, and the Claude (Anthropic) API. Comfortable across the stack — front-end interfaces, Python/FastAPI backends, REST APIs, and OAuth integrations — with a portfolio of deployed projects. Strong interest in workflow automation and applying generative AI to solve practical, real-world problems.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Frameworks & Tools: Flask, FastAPI, Git & GitHub, Chart.js, Claude API, Gmail API, FFmpeg, Whisper, AWS

Concepts: REST APIs, OAuth 2.0, prompt engineering, RAG, speech-to-text, AI workflow automation

PROJECTS

AI Video Clipper — *Python · FastAPI · FFmpeg · Whisper · Claude API · ElevenLabs*

AI-powered video clipper that transcribes footage with Whisper, uses the Claude API to identify highlight-worthy segments, and renders finished clips with FFmpeg. Backed by a FastAPI service with GPU-accelerated processing and ElevenLabs voice generation.

Email Automation Bot — *Python · Gmail API · OAuth 2.0*

Auto-responder that authenticates to Gmail via OAuth and triggers contextual replies to incoming mail demonstrating real API integration and secure authentication beyond the front-end.

Support Ticket Queue — *Python · Flask*

Flask-based ticketing system with two user roles, employees submit tickets, support agents work the queue and a full ticket lifecycle (open, in-progress, resolved, closed, with reopen). Demonstrates server-side routing, forms, and state management. Front and back-end.

Portfolio FAQ Assistant — *JavaScript · DOM*

Rule-based, keyword-driven chatbot built from scratch and embedded in the portfolio site to answer visitor questions about projects and skills. Handled real integration challenges including z-index/pointer-events layering and deployment caching.

Monthly Expenses Tracker — *JavaScript · Chart.js · localStorage*

Self-contained budgeting web app with custom categories, BHD currency support, budget tracking, and live charts. Data persists locally; runs as a single file with no dependencies.

Product Page Website — *JavaScript · HTML · CSS*

Polished e-commerce product page with real colorway photography, interactive feature hotspots, and a mock checkout flow built as part of a portfolio CSS redesign.

Timer — *JavaScript · Web Audio API · Service Worker*

Round timer and stopwatch with lap tracking, audio cues, and a classic timer look. Works offline via a service worker and is deployed live on Vercel.

Calculator App — *JavaScript · HTML · CSS*

Terminal-inspired calculator with smart bracket handling and percentage logic, plus offline support. One of the first pieces deployed in the portfolio.

WORK EXPERIENCE

IT Specialist Intern — Infracorp (GFH), Bahrain

May 2025 – Jul 2025

- **Network Management:** Configured, maintained, and troubleshoot both hardware and software across the IT environment.
- **Cloud & Collaboration:** Managed OneDrive and SharePoint for data storage, sharing, and team collaboration.
- **System Administration:** Handled user access control, software updates, and security across the IT infrastructure.
- **Technical Support:** Resolved connectivity, software, and hardware issues to keep teams communicating smoothly.

Intern — Sama Card Bahrain, Bahrain

Oct 2023 – Dec 2023

- Supported web development and digital marketing initiatives.

Support — Freia Marketing, Bahrain

Jan 2022 – Jun 2022

- Produced content and managed social media channels.

EDUCATION

University of Technology Bahrain — Bahrain

Sep 2019 – Dec 2024

BSc in Computer Science. Varsity Basketball.

Al Noor International School — Bahrain

Sep 2010 – Jun 2019

Cambridge A Levels and IGCSEs.
